

## **RADIO OPERATORS REQUIRED**

Radio operators are dedicated personnel around the Billown Course for Southern 100 Motorcycle Racing.

Radio Operators are an integral part of the Marshalling Team at each post as the link between Race Control and the Marshals.

Concentration, clarity and an understanding of radio procedures are the required skills.

Last year a new state-of-the-art radio system was introduced and this system has been further enhanced for use this year.

To fully achieve all the benefits from the system and ensure that all works correctly on practice and race days. We are asking that you sign on early in order that we can arrange a short training course prior to events beginning.

To sign on as a radio operator, please go to the Marshals sign on forms, print and complete as necessary; returning as soon as possible.

We look forward to welcoming new and returning radio operators.
